

SUPPORT SAFE, SUSTAINABLE ENERGY!

We, the undersigned, are deeply concerned about global climate change and energy security in this era of dwindling supplies of oil and other non-renewable resources. We urge our elected officials at all levels of government to support an energy future that is sustainable, secure and climate friendly.

Current energy policies will not work. We urge Congress to end all subsidies and incentives for both fossil fuels and nuclear power, as these are dirty, dangerous and finite. We must instead make it our national policy to do more with less by making our economy much more energy efficient and to move as rapidly as possible to clean, safe, renewable sources, such as solar, wind, tidal and geothermal energy.

We call upon all elected officials to take action to promote energy policies that assure us ample energy for generations to come without the risks inherent in fossil fuels and nuclear power.
